Curriculum year	**Course name**	*Code*	*Semester*	*T+U Clock*	*Credit*	*ECTS*
	DİGESTİVE SYSTEM AND RESPIRATORY SYSTEM HISTOLOGY AND DEVELOPMENT		I	3+2	4	6

Language of the Course	Turkish
Course Level	Master's Degree
Department/Program	Histology Embryology
Education Type	formal
Type of Course	Optional
Prerequisite Courses	no
Department/Program coordinator	Prof. Dr. Mehmet Yüncü
Course Supervisor(s)	Prof. Dr. Mehmet Yüncü
Course Assistants	Asst. Prof. Çiğdem Karaca , Asst. Prof. Ayşegül Burçin Yıldırım Asst. Prof. Mustafa Öztatlıcı
Course Objectives	Students taking the course should have information about the digestive system, respiratory system histology and development.
Course Content	Development and anomalies of the digestive system; oral cavity, teeth, tongue, salivary glands, pharynx, esophagus, stomach, small intestine, appendix, large intestine, gall bladder, pancreas and liver histology. Development and anomalies of trachea, bronchi and lungs; histology of the nose, larynx, epiglottis, trachea, bronchus, bronchioles, alveoli and pleural membrane.
Teaching-Learning Methods and Techniques Used in the Course	Face-to-face education, homework, presentation-seminar, quizzes, midterm exams, Laboratory, Research
Course Internship Status	No

Course Learning Outcomes
1. To have general information about the histology of the digestive and respiratory systems
2. Explain the development of the digestive and respiratory systems.
3. Explain the histological structure of the organs that make up the digestive and respiratory systems.
4. Will be able to explain the cell types and properties that make up the digestive and respiratory systems.
5. Explain the digestive and respiratory system anomalies.

COURSE FLOW	
Week	**Topics**
1	Oral cavity, teeth, tongue, salivary glands histology
2	Histology of the pharynx, esophagus
3	Stomach, small intestine, appendix histology
4	Large intestine, gallbladder histology
5	Liver and pancreas histology
6	Digestive system development and anomalies
7	Examination of Digestive System Preparations (Laboratory)
8	Article Hour - Seminar
9	Nose and pharynx histology
10	Larynx and epiglottis histology
11	Histology of the trachea and main bronchi
12	Lung and pleural membrane histology
13	Respiratory system development and anomalies
14	Examination of Respiratory System Preparations (Laboratory)
15	general evaluation

ASSOCIATION OF COURSE LEARNING OUTCOMES WITH PROGRAM OUTCOMES

No.	Program Learning Outcomes
1	Have general knowledge about the human body
2	Have detailed information about the histological structures of human tissues and organs.
3	Learns histological and histochemical techniques
4	Have detailed information about general human embryology.
5	Learn to use research lab tools and materials
6	Improves scientific article reading and evaluation proficiency
7	Can make histology laboratory applications to undergraduate students
8	Gains a general vision about basic medical sciences
9	Provides the necessary knowledge to participate in the doctoral program
10	Provides the competence to be a researcher in multidisciplinary research
